Technical Research Assistant - Computational Fabrication Group

Support researchers in Computational Fabrication Group
MIT

Postdoctoral Fellowship and Teaching: Understanding key elements in plant-microorganism interaction

Main objective of this group is to understand the key elements in plant - microorganism interaction, from control of metabolic and signaling pathways to metabolism and epigenetic gene regulation.

Universidad San Pablo CEU

Research Scientist

The specific role is to provide high level plant pathology expertise to a team of field-based crop and pasture agronomists, physiologists, soil scientists, and animal scientists.
